

ALTRIENT LIPOSOMAL GLUTATHIONE

THE BREAKTHROUGH IN VITAMIN
DELIVERY AND ABSORPTION.

Altrient use a cutting-edge patented liposomal encapsulation technology process that wraps up nutrients in tiny phospholipid spheres which helps protect the nutrients from being broken down in the digestive system. Altrient nutrients get absorbed safely and swiftly into the blood stream and are efficiently delivered to cells where we need them most.

MAXIMISED ABSORPTION FOR MAXIMISED BENEFITS

Altrient's unique liposomal delivery system is especially suited for water soluble nutrients and nutrients which when supplemented in traditional oral forms are poorly absorbed or may get quickly depleted from the body. The difference in the effectiveness of absorption, utilisation and efficacy is due to the advanced liposomal delivery system.

KEY FEATURES:

- ✓ Leading liposomal glutathione formula.
- ✓ Recommended by nutritionists and health professionals.
- ✓ Liquid food supplement (gel) containing the biologically active (reduced) form of glutathione.
- ✓ Each sachet contains 450mg of Setria glutathione.
- ✓ Easy to take with a small amount of fruit juice or water.
- ✓ Convenient single dose sachets, easy to take on the go.
- ✓ Long shelf-life, 18-months from manufacture, store at room temperature.
- ✓ Suitable for vegetarians and vegans.
- ✓ Free from – gluten, sugar, sweeteners, stevia, artificial additives.
- ✓ Contains a natural preservative which can be easily evaporated.
- ✓ Made by LivOn Labs, pioneers of liposomal encapsulation technology.

NUTRITIONAL INFORMATION

30 Servings. Serving Size: 1 sachet (5.4ml)	Per serving	% NRV*
Setria® Glutathione (reduced form)	450 mg	†
Phospholipids (from soya lecithin)	1000 mg	†
<i>of which phosphatidylcholine</i>	500 mg	†
*Nutrient Reference Value / † NRV not yet established		

Ingredients: Deionized Water, Lecithin Phospholipids (**soya**), Setria® L-Glutathione, Preservative: Grain Alcohol (**ethanol**), Acidity regulator: Potassium Hydroxide.

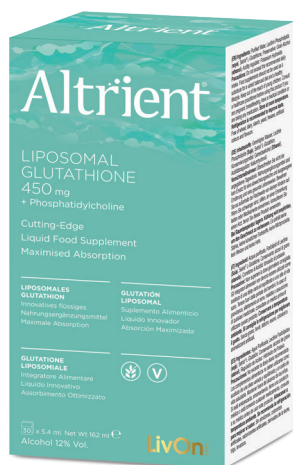

Precautions: Do not exceed the recommended daily intake. Food supplements should not be used as a substitute for a varied balanced diet and a healthy lifestyle.

Keep out of the reach of young children.

Consult a healthcare practitioner before using this product if you are pregnant, breastfeeding, have a medical condition or are taking any medication.

Store at room temperature. Free of wheat, dairy, starch, yeast, hexane, artificial colours and flavours.

Directions: Take 1 sachet per day. Open the sachet, squeeze the gel contents into a small amount of water or juice, drink on an empty stomach 15 minutes before eating. The gel content will not dissolve.

Does not contain: GMO ingredients, added sugar, wheat, gluten, yeast, dairy, meat products, hexane, soya protein, artificial colours or flavours.

THE KEY BENEFITS OF ALTRIENT GLUTATHIONE:

Glutathione is present in virtually all cells in the body and is known to play an important role in innumerable cell functions, which underscores its biological significance. Glutathione is essentially a protein molecule composed of three amino acids - cysteine, glutamate and glycine. High concentrations of glutathione are found in the liver where it acts as an important cofactor for many of the enzyme reactions that take place.

Glutathione is amongst the most efficient defence nutrients used by cells and tissues throughout the body. The glutathione status within the cells may provide a particularly good indicator of the cell's overall health and its ability to neutralise harmful free radicals.

Dietary restrictions or an imbalance in general health could influence the body's antioxidant and nutritional demands. Providing the correct balance of nutrients can sometimes be challenging. In these circumstances supplementing with a high quality well absorbed Altrient Glutathione may offer valuable nutritional support.

- ✓ Glutathione levels tend to be at their lowest in the morning making this an ideal time to supplement with Altrient Glutathione
- ✓ Standard oral glutathione products are poorly absorbed due to the action of an intestinal enzyme that degrades glutathione
- ✓ Altrient Glutathione is the perfect complement to a diet rich in foods that provide excellent sources of antioxidant nutrients.
